Software Development Engineer
Software Architect Java / Java EE
Web Application Development Consultant

14 years experimented

Formation

- 1997-2002 Computer Sciences Engineer graduated from Université of Technologie of Compiègne

Expérience professionnelle

- Mar. 2014 - April 2016 **Software Architect - Freelance, PMSIpilot, 2 years**

In a Software editor building business intelligence solutions for the healthcare sector:

- Application Performance Management
- Design Documentation
- Mentoring and training junior engineers
- Code review, bug fixing and performance optimization of existing code
- Design and implement RESTful Web Services API and algorithms for Business Intelligence

Technologies : Gatling, Java, Spring, Tomcat, Postgresql, Gitlab, Vagrant, Jenkins, Openstack, Docker

- Sept. 2013 - Dec. 2013 **Technical leader - Freelance, CGI, 3 months**

In a lead technical unit for Application Management of EDF software, doing :

- Code Insight / Code configuration Insight
- Technical architecture documents writing
- Support development teams (40 people)
- Performance tests

Technologies : JMeter, Sonar, Jenkins, Weblogic

- Oct. 2009 - Jul. 2013 **Technical leader - Freelance, bioMérieux, 4 years**

Develop and enhance enterprise level software applications for Mass Spectrometry et clinical diagnostics, including [VITEK® MS](#)

- Responsible to implement the software architecture
- Directly involved in coordinating the deployment of software releases
- Development of software and database design specifications
- Managed integration and user acceptance software testing efforts
- Lead a team of four analysts, developers
- Responsible of support level 4 of the commercial product

Technologies : GWT, JSF, EJB, CXF, Camel, JMS, Spring, JPA, JBoss, Maven, Postgresql, Jenkins

➤ Jan. 2009 - May 2009 **Software Architect J2EE - Freelance, Sopra Group, 4 months**

In a team of 5 software architects,

- Studing Ajax frameworks to choose one that feet our needs
- Development of proof of concepts
- Use case analysis, development of jsp tags libraries to be reused by near-shore development teams in Spain (3 softwares - 80 devs)

Technologies : HTML, Ajax, Dojo, Javascript, J2EE (JSP, Taglib), Struts, Magic Draw UML

➤ April 2007 - Jan. 2009 **Lead developer - Freelance, Solic, 2 years**

I have designed and developped two applications for a small company (around 70 people) for their hiring process.

One that manages candidate database with hiring state, interviews ,full text search of resume and reportings

One that allows surveys for enterprise, measuring performance and satisfaction at work, used by big companies including MAIF, Credit Agricole...

Technologies : HTML, Ajax, JSP, Struts 1.3, J2EE, Spring 2.5, JExcel, Hibernate 3
Eclipse, Apache 2.2, JBoss, Maven 2, Ant, JUnit, Cobertura, Selenium, MySQL 5.0

➤ Sept 2002 - Avril 2007 **Software Developer Java EE, 5 years**

In Computer Engineering Service Society in Paris, as a contractor, I have been tasked in many missions in big companies. Among other clients were Renault, Generali, Accor and Numericable.

- Engaged in all cycles of design and development in Java Enterprise Edition
- Development of software and database design specifications
- Overall accomplishment: Consistently delivered a quality software product on time and within budget.

Clients : Parexel, Atos Origin, Generali, Renault, Accor, Numéricable, Cegedim

Technologies : HTML, Javascript, JSP, Servlet, Struts, Java, Spring, WebServices, Axis, JMS, EJB, J2EE, Hibernate, POI, ASP.NET, C#, ADO.NET, PLSQ, Maven 2 and 3, Ant

Software : Eclipse, SVN, TOAD, Power AMC

Applications Servers: Websphère 4 et 5 , JBoss 4 et 5, Sun One, Tomcat

Databases : MySQL, Oracle, SQL Serveur

Languages : English spoken (7 months training period in Boston for Parexel)
